What are dental sealants and fluoride varnish?

Dental sealants are a special coating painted onto the chewing surfaces of the back teeth. **Fluoride varnish** is a special coating with fluoride. It is painted on all teeth.

Dental sealants and fluoride varnish are safe,
painless to get (no shots), and help prevent cavities!

NOTE: Parent/guardian must accompany each child.

Priority will be given to children who have appointments. Walk-ins will be taken when possible.

Funded by San Diego County Dental Society, in collaboration with San Diego County Dental Hygienists' Society, San Diego County Smiles Program, Share the Care Dental Program and Southwestern College Dental Hygiene Program.
